DEMO DATA — fictional profile. Not a real person; not verified employment or education history.

Aarav Sharma

B.Tech in Computer Science and Engineering · Example Institute of Technology
aarav.sharma.demo@example.com · +91-9000001234 · Pune, Maharashtra, India

Career Objective

To begin my career as a software engineer, contribute to practical software development projects, and strengthen my skills in backend engineering, AI applications, and system design.

Education

Degree	B.Tech in Computer Science and Engineering
University	Example Institute of Technology
Graduation Year	2027
CGPA	8.6/10

Technical Skills

Programming Languages	Python, C++, JavaScript, SQL
Frontend	React.js, HTML5, CSS3, Tailwind CSS
Backend	Node.js, Express.js, FastAPI
Databases	MongoDB, PostgreSQL, MySQL
AI and Machine Learning	Large Language Models, Retrieval-Augmented Generation (RAG), Semantic Search, Document Processing, Natural Language Processing
Tools	Git, GitHub, Docker, Postman

Work Experience

Software Development Intern — DemoTech Solutions (fictional)
Duration: May 2026 – July 2026
Fictional internship entry for demonstration; not verified employment history.

Responsibilities

- Developed REST API endpoints for an internal project management application.
- Implemented database operations for storing and retrieving project information.
- Assisted with frontend integration and API testing.
- Collaborated with team members to identify and resolve application bugs.

Achievements during the internship

- Implemented automated API tests for selected endpoints.
- Improved the reliability of the demo application's data validation workflow.

Projects

Project 1: AI-Powered Resume Assistant
Description: Developed a prototype that extracts information from resumes and retrieves relevant details to answer questions about a candidate's qualifications.
Technologies: Python, FastAPI, RAG, vector database.

Project 2: Smart Campus Monitoring System
Description: Developed a prototype for monitoring campus entry and exit events, managing student records, and generating attendance reports.
Technologies: React, Node.js, Express.js, MongoDB.

Project 3: Task Management Web Application
Description: Built a web application for creating, updating, assigning, and tracking tasks.
Technologies: React.js, Express.js, PostgreSQL.

DEMO DATA — fictional profile. Not a real person; not verified employment or education history.

Strengths

- Analytical problem-solving.
- Quick learning and adaptability.
- Ability to break complex problems into smaller tasks.
- Team collaboration.
- Willingness to learn new technologies.

Weaknesses

I sometimes spend extra time refining technical solutions because I want them to be reliable. I am improving my ability to prioritize tasks, define time limits, and balance code quality with delivery deadlines.

Achievements

- Completed an academic project involving REST APIs and database integration.
- Built multiple academic software prototypes.
- Practiced programming and problem-solving through technical exercises.

All achievements and experience in this document are fictional demo content.

Additional Information

Availability	Immediate
Preferred Role	Software Development Engineer
Preferred Work Mode	Hybrid
Notice Period	Not applicable to the fictional student profile.
